STAT

1. The Printing and Photography Division sees no special areas of technology requiring Agency research and development.

2. We assume that ORD will continue to push for expansion of the Presentational Means Workshop for the DDI. This is now underway with an initial procurement of TV equipment, and, if it goes according to plan, will expand into the motion picture and paper presentation areas.

3. Rapid progress is taking place in printing technology due to the variety of needs for newspapers to automate. We will let the newspapers finance the R&D and take advantage of new equipment as it is developed, e.g. Paginator and laser platemaker.
